

EMMANUEL OLADELE OKUNLOLA

☎ +234 (0)810 900 2739 | ✉ niyotokunlola@gmail.com | in [LinkedIn](#)

PROFESSIONAL SUMMARY

Product specialist and data scientist with hands-on experience designing and deploying Artificial Intelligence (AI) and Machine Learning (ML) solutions for lending operations, automation of support workflows, and multimodal data pipelines. Strong background in automotive technology, robotics, and applied machine learning with practical experience across product implementation, model development, and cross-functional training with a proven ability to reduce operational friction and improve decision-making through data-driven systems.

EDUCATION

- **Ekiti State University** Ado-Ekiti, Nigeria
Bachelor of Technology Education in Mechanical and Auto Mechanical Technology Sep 2017 – Jun 2023
(B.Tech.Ed.), Second Class Upper Division (CGPA: 4.36/5.00)
 - Relevant coursework: Introduction to Mechatronics and Robotics, Basic Electricity, Mechanical Drawing, Numerical Methods, Mathematics and Basic Calculus, Auto Workshop Management, Mechanical Drawing, Internal Combustion Engines (ICE) and Fuel Systems.

PROFESSIONAL EXPERIENCE

- **Robotics and Artificial Intelligence Nigeria (RAIN)** Ibadan, Nigeria
Course Instructor and Lead Researcher Jan 2026 – Present
 - Delivered hands-on instruction in robotics and intelligent systems, covering ROS2, path planning, digital twin technologies, and embedded systems development.
 - Taught cloud deployment for web applications using tools like Render and AWS, enabling students to deploy AI and robotics solutions to scalable production environments.
 - Mentored and supervised student research projects across robotics, AI, and autonomous systems, guiding problem formulation, system design, implementation, and evaluation.
 - Supported the development of robotic systems by integrating sensors, microcontrollers, and control algorithms for real-world applications.
 - Facilitated project-based learning by assisting students in debugging, testing, and optimizing their solutions.
- **Lendsqr** Remote, Nigeria
Product Specialist (Lender Operations) Oct 2024 – Dec 2025
 - Implemented ML and data science solutions to improve lender operations and loan processing efficiency.
 - Built a Credit Custom Model to estimate loan repayment probability, contributing to lower non-performing loans.
 - Automated ticketing workflows by integrating n8n with Google Chat for summarization and escalation, reducing median resolution time for escalated issues from approximately 2 hours to about 45 minutes.
 - Developed a multimodal model that combines transaction narration, entry type, and date features to classify bank transactions and derive borrower debt-to-income metrics.
 - Designed structured intern training modules focused on customer support handling and escalation pathways.
- **One Campus Data Analysis (Cohort 17)** Remote, USA
Data Analyst Intern Jul 2022 – Jun 2024
 - Built a grocery-store manager prototype using Python (OOP) and Pandas to simulate inventory and sales logic.
 - Performed data cleaning, outlier handling, and exploratory analysis with Pandas and NumPy to support predictive tasks.
- **Freelance Python Developer** Remote
Software Developer Nov 2022 – Oct 2023
 - **Maze Searcher App:** Implemented maze rendering and solver algorithms (BFS, DFS) with Python Turtle and PIL; focused on algorithm correctness and visualization.
 - **Data Visualization with Processing:** Processed a global CO₂ emissions dataset (1751–2014) and produced interactive visualizations using Processing and GeoPy for geocoding.
- **Auto Clinic** Ibadan, Nigeria
Automobile Mechanic Assistant Sep 2019 – Dec 2019
 - Assisted in vehicle diagnostics, maintenance and road testing; validated repair outcomes and recorded results for quality control.
 - Used CRM tools to manage vehicle delivery schedules and customer notifications.

SELECTED PROJECTS

- **Multimodal Transaction Classifier** — *Prototype model that uses narration text, entry type and date features to classify bank transactions for credit evaluation.*
- **Electric Go-Kart (Research)** — *Designed and fabricated a microcontroller-based electric go-kart with gyroscope-assisted wireless steering input for improved vehicle stability and control.*

- **Mini Cannon Launcher (Research)** — Built a compressed-air projectile launcher to study projectile dynamics and system safety considerations.

SKILLS & TOOLS

Programming & Data: Python, SQL, C++, Bash, L^AT_EX.

Data Science & ML: Pandas, NumPy, Scikit-learn, TensorFlow and Keras, PyTorch.

Systems & DevOps: n8n, Git, Docker, REST APIs, AWS, Render.

Robotics & Simulation: ROS2, Turtle, PyBullet,.

Embedded & Hardware: ESP32, Arduino IDE, Raspberry Pi.

Tools & Software: MySQL, MongoDB, Flask, OBS, Adobe Premiere and Audition.

RESEARCH & TECHNICAL EXPERIENCE

- **Robotics and Artificial Intelligence Nigeria (RAIN)** Ibadan, Nigeria
Research Assistant Oct 2022 – Sep 2023
 - Designed and developed a mini cannon launcher using PVC pipes, normally closed valves, and compressed air to study projectile dynamics.
 - Fabricated an electric go-kart with microcontroller-based wireless steering input using gyroscope sensors to explore vehicle control and safety improvements.
 - Built a [two-wheeled self-balancing robot](#) using an Arduino, gyroscope sensors, and PID control to study stabilization algorithms.
 - Developed NLP models and deep-learning pipelines (TensorFlow and Keras) for a chatbot and for medical image classification (malaria and breast cell datasets).
 - Used Pandas and NumPy for data preparation, training set creation, and preprocessing for ML tasks.

VOLUNTEER EXPERIENCE

- **The Triumphant Baptist Church** Ibadan, Nigeria
Multimedia Production Lead Jan 2022 – Jun 2024
 - Used video mixers, sound mixers, and camcorders with broadcasting software (OBS) to live stream church events to retain membership of the church during the lockdown period as a result of the COVID-19 pandemic to maintain community engagement.
 - Developed and implemented a Standard Operating Procedure (SOP) that established clear, stringent requirements for team membership and outlined structured guidelines for effective collaboration with other departments.
 - To enhance team management and overall productivity, I established sub-teams, allocated responsibilities, and assigned experienced members as mentors to guide new trainees.
 - Assess and capture videos to guarantee digital integrity to get the best video output, raising online membership of the church by 5% using software like Adobe Audition and Premiere Pro.

CERTIFICATIONS

- **Intermediate Python** — (2021)
- **Robotics and Automation Developer** — (2023)
- **Introduction to Generative AI AWS** — (2025)
- **Supervised Learning with scikit-learn** — (2025)
- **Meta AI Agents and Agentic AI Systems development** — (2025)

LANGUAGES

- Fluent in English
